

AIS Edge, a fully Web-based Intervention Services Management System makes it easy to identify, plan, track and report on Academic and Response to Intervention Services with features such as:

- ✓ Easy PIR Worksheet Creation
- ✓ Graph Student Results
- ✓ Progress Monitor
- ✓ Fully Integrated w/ ClearTrack
- ✓ Reduce Special Education Referrals
- ✓ Query and report on any field
- ✓ Full Historical Tracking
- ✓ Student System Imports of both Students, Staff and Assessment Scoring
- ✓ Custom Letter Creation and Communication Tracking
- ✓ Customizable to Support the Individual District's AIS/RTI Plan
- ✓ Fully Customizable Security
- ✓ Custom and Canned Reporting, including Progress Reports.
- ✓ Anytime, Anywhere Access
- ✓ SIF Compliant
- ✓ NYS Data Warehouse

**Web-based Complete
Intervention Services
Management System**

Report**

AIS/RTI

What is AIS/RTI?

Academic Intervention Services (AIS) is supplemental instruction beyond the general curriculum to help students at risk of not achieving New York State Learning Standards. These services are designed to improve academic performance and may include guidance, counseling, attendance, and study skills.

Response to Intervention addresses student's individual needs by providing individualized interventions and measuring the student's level of performance over time to make important educational decisions.

Districts are required by NYS Department of Education to have a plan describing the criteria for identification as well as strategies for implementation of AIS services.

Effective July 1, 2012, school district's will no longer use severe discrepancy criteria to determine whether students in kindergarten through grade four have a learning disability in the area of reading. Districts must provide these students with researched based interventions before a student can be classified as learning disabled.

AIS Edge:

AIS Edge makes the tasks of identifying, planning, tracking and reporting Intervention Services faster and easier. The system is a complete RTI tracking program from Universal Screening to Special Education Referral.

Identify

With the ability to review Universal Screenings for all students, identify at risk students before they fail. Academic assessment scores can be imported saving time and reducing duplication.

Plan

Work collaboratively online to develop more effective plans to better serve the student's individual needs. Progress Monitor student performance to predict student success.

Track

Intervention history can be viewed per student, over the year or many years to get a complete picture of the student's needs and progress.

Report

Quickly produce graphs, progress reporting, state reporting, and custom reporting. Create custom letters starting with letter templates or create from scratch.

Our Experience

AIS Edge Web-based Complete Intervention Services Management System was developed by Broome-Tioga BOCES, with 20-plus years experience in Special Education Management Systems. Our systems have been used to track AIS since the initiative's adoption by the NYS Department of Education.

The software is developed using the cost-effective sharing of services model, allowing your Regional Information Center to offer the AIS Edge software to districts with no licensing fees.
